## Work Experience

### Web Industrial Solutions

Web Developer, April 2020 – September 2021

- Launched 4 E-commerce websites built in Wordpress and PHP, tailored to meet client requirements, functionality, and designs
- Collaborated with team members to develop plugins for the Wordpress E-commerce market.
- Developed and implemented features for the E-commerce site of our sister company that improved ease of use for the store managers greatly.
- Performed maintenance and data cleanup on the MySQL database of the same company.
- Reviewed and revised existing codebase to reduce load time on the website by up to 50%

## Education

### Bachelor of Science in Computer Science

University of Toronto 2014-2019

## Projects

### Google Books Search | <https://github.com/Saigonmai/GoogleBooksSearch>

- An app that allows the user to search for and preview books through the google API, which can be saved to a list for later viewing.
- Books are searched by accessing the Google API with the query term through Axios and are then displayed using a React interface.
- Saved books are handled through a combination of MongoDB and mongoose.

### Burger Buster | <https://github.com/Saigonmai/burger>

- A web app where the user can create burgers and then mark them as devoured (works similarly to a task checklist).
- The interface is handled with a combination of handlebars and jQuery
- All the data storage is handled using MySql and an ORM.

## Technical Skills

- Languages: JavaScript, CSS3, Java, Python
- Frameworks/Tools: Node.js, Express, React, Redux, Bootstrap, Jquery
- Databases: MongoDB, Mongoose, MySQL
- Additional Skills: AJAX, Git, Debugging, Agile-based Project Management
